Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the "*name of the Procuring Entity*" and "*address for bid submission*," should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.

- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.
- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

DETAILED TECHNICAL SPECIFICATIONS

1. Project Title & Rationale

Procurement of Primary and Secondary Dedicated Internet Services for the Insurance Commission (Project Reference No. 2024-05-124 & 2024-05-125)

The Insurance Commission (IC) has observed a substantial increase in internet usage due to the growing reliance on digital tools and online services. The current internet infrastructure, with a bandwidth of 250Mbps for primary and 100Mbps for secondary connections, is becoming insufficient to meet the demands of our internal processes and the needs of our external stakeholders. As a result, there have been instances of network congestion and slower data transmission.

To address these challenges and support the expanding digital operations, the IC proposes the procurement of enhanced internet services through the following projects:

- Lot 1: Procurement of Primary Dedicated Internet Services for the Insurance Commission – **500Mbps**
- Lot 2: Procurement of Secondary Dedicated Internet Services for the Insurance Commission – **300Mbps**

These Two (2) lots shall be awarded to Two (2) Different Internet Service Providers (ISPs). The primary internet access shall have a guaranteed bandwidth capacity of 500Mbps while the secondary shall have a guaranteed speed of 300Mbps. Both ISP services shall be aggregated during normal operations. In case of technical failure or malfunctioning of either of the services, primary or secondary or vice versa, internet access shall be automatically routed to any of the operational ISP without hampering the business operations of IC.

Prospective bidders can bid on both or either of the lots. If a bidder's proposal is determined to be the lowest offer for both lots, the IC must first consider its bid offering for Lot 1. If IC determines that its bid is the Lowest Calculated and Responsive Bid (LCRB), the contract for Lot 1 will be awarded to that bidder. If the same bidder also bid for Lot 2 and was deemed the Lowest Calculated Bid (LCB), the Lot 2 contract will not be awarded to that bidder. Following that, IC will evaluate the second LCB for Lot 2 and possibly award the contract.

2. Objective

The objective of this procurement project is to procure enhanced Primary and Secondary Dedicated Internet Services for the IC, aiming to significantly improve its existing internet infrastructure. The current internet service providers supply a bandwidth of *250Mbps for Primary Internet Service* and *100Mbps for Secondary Internet Service*. Recognizing the growing demands of its operations, the organization intends to upgrade the bandwidth to **500Mbps**

for the primary service and 300Mbps for the secondary service. This enhancement will ensure that its internal and external stakeholders receive faster, more reliable internet access, supporting its commitment to operational excellence and customer satisfaction.

By increasing the aggregate bandwidth, the IC seeks to bolster its digitization initiatives and uninterrupted access to critical online resources and information systems. The upgraded services will provide a robust and scalable internet infrastructure capable of supporting the current needs and future growth. This strategic move will enhance the IC's ability to serve stakeholders effectively and streamline our operations.

3. Subscription Period

The subscription period for the project shall be for **Twelve (12) Months** from the issuance of the Certificate of Acceptance after the completion of delivery, installation, and configuration of internet equipment/devices.
